

The exhibits provide evidentiary support for the inventor possessing the claimed invention before the critical date of Schrier. Each portion of the pending independent claims is followed with an identifier beginning POL or THB followed by a number to indicate the page in the exhibits (marked at the bottom of each exhibit page) where support can be found for the pending claims.

**Addendum for Claim 70**

**A computerized prescription system comprising:**

**at least one user computer, said user computer having a graphical user interface for displaying and providing access to:**

POL 02237	Our software provided additional functionality and is distributed free of charge to all members. It has an easy to use menu driven graphical user interface (GUI) and is compatible with all major computer operating systems, including DOS, Windows, Macintosh, and Unix.
-----------	---

**(1) a plurality of patient records, each patient record including information about a patient's prescription history; and**

POL 03775	patient prescription profiles
THB 08067	chart depicting a patient record being accessible by a physician so that a physician can perform a subject and/or objective assessment plan, prior to writing prescription
THB 06017	(providing) on-line patient information for efficient retrieval and transaction processing

**(2) information about pharmaceuticals correlated with medical conditions for which the pharmaceuticals are suitable for treating, said information derived from at least two of said plurality of patient records.**

THB 06010	PPN is designed to access patient record information
THB 06017	drug information ...hospitals, pharmacists and other health-care participants
POL 02243	<5> Patient Information
POL 02271	prescriber-level prescription data...
POL 03311	whereby the drug information modules can access drug information queries and that those queries can further go down through diagnostic queries
THB 06010	PPN provides prescription drug benefits providers; retail pharmacists and mail-order suppliers with an ability to offer new products/services
THB 06011	the physician is given a choice of drugs to prescribe
TAB 06012	full drug information...
POL 03545	<ul style="list-style-type: none"> <li>• Alternatives</li> </ul> National Formulary Standard... Pharmaceutical Data
POL 03548	National Formulary Standard Therapeutic Equivalents

Addendum for Claim 84

A computer implemented method of formatting an electronic prescription, comprising the steps of:	
POL 02248	By seamlessly integrating all the information relevant to making informed therapeutic decisions (including relevant formularies, price lists, drug information, and potential drug interactions) at the "point-of-sale," our "Smart Electronic Prescription Pads" and personalized prescription management software intelligently automate the prescription-writing, tracking and fulfillment process to facilitate cost-effective therapeutic decision-making. As full featured communication terminals, our PDA can access all of our other online information products and services as well.
POL 03312 - 03313	...PPN will rely on a new class of electronic devices known as Personal Digital Assistants (PDAs). PDAs are low-cost easy-to-use pocket-sized pen-based computers which allow mobile professionals such as physicians to communicate from anywhere over wireless networks. Exhibit G, THB 06012
THB 06012	1. Online Formulary: With the cooperation of the leading companies that manage prescription drug benefit programs, PPN links the physician with the various formularies through an electronic prescription pad ("Smart Script") which helps the physician identify the preferred prescription choices at the point of prescription writing. PPN's proprietary Smart Scripts software allows for continuous updating of formularies and seamless integration into the prescription writing process. No matter which plan a patient is covered by, while the physician is writing a prescription, he is made aware of any therapeutic alternatives at the appropriate time. This will obviate the need for pharmacists to retrospectively contact the physician about such alternatives.

a. assembling a plurality of patient records each including prescription information, using a computer interface, the prescription information including a patient condition associated with a prescription;	
POL 03779	Rx [artwork]
POL 03780	Welcome to...A Personal Online Medical Information and Communications Service for Member Physicians
